

Contents

chapter 1	Algebra 1	1
1.1	Polynomial expressions	1
1.2	Polynomial functions, an introduction	6
1.3	Factorising algebraic expressions	11
1.4	Simplifying algebraic fractions	15
1.5	Binomial expansions	19
1.6	Algebraic identities	22
1.7	Manipulating formulae	28
1.8	Algebraic patterns, an introduction	31
1.9	Solving equations	35
1.10	Solving simultaneous linear equations	37
	Revision exercises	45
chapter 2	Algebra 2	49
2.1	Quadratic equations	49
2.2	Nature of quadratic roots	54
2.3	Solving quadratic and linear equations	59
2.4	Quadratic and linear equations in context	61
2.5	Forming quadratic equations from their roots	64
2.6	Max and min of quadratic graphs	66
2.7	Surds	71
2.8	Algebraic surd equations	74
2.9	The factor theorem	77
2.10	Graphs of cubic (and higher order) polynomials	81
	Revision exercises	89
chapter 3	Trigonometry 1	96
3.1	Radian measure	96
3.2	Trigonometric ratios	99
3.3	Trigonometric functions	103
3.4	Sine rule – area of a triangle	107
3.5	The Cosine rule	113
3.6	Problems in three dimensions	118
3.7	Graphs of trigonometric functions	124
3.8	Related trigonometric graphs	128
3.9	General solutions of trigonometric equations	135
	Revision exercises	139
chapter 4	Coordinate Geometry: The Line	146
4.1	Revision of formulae	146
4.2	The area of a triangle	150

4.3	The equation of a line.....	152
4.4	Dividing a line segment in a given ratio	157
4.5	Concurrencies of a triangle	158
4.6	Perpendicular distance from a point to a line	161
4.7	The angle between two lines	165
4.8	Using linear relationships to solve problems	167
	Revision exercises	170
chapter 5	Probability 1	175
5.1	Permutations.....	175
5.2	Combinations.....	182
5.3	Elementary probability	187
5.4	Experimental probability – relative frequency	193
5.5	Mutually exclusive events – the addition rule.....	198
5.6	The multiplication law for independent events.....	205
5.7	Conditional probability.....	210
	Revision exercises	216
chapter 6	Geometry 1	223
6.1	Angles, triangles and parallelograms	223
6.2	Theorems involving triangles and parallelograms	229
6.3	Ratio theorems.....	235
6.4	Circle theorems.....	245
	Revision exercises	252
chapter 7	Differential Calculus.....	260
7.1	Average rate of change	260
7.2	Limits – continuity	264
7.3	Differentiating from first principles.....	270
7.4	Differentiation by rule	274
7.5	Product, quotient and chain rules	279
7.6	Second derivatives	285
7.7	The derivatives of trigonometric functions	287
7.8	Differentiation of inverse trigonometric functions.....	291
7.9	Differentiation of exponential functions	293
7.10	Differentiating logarithmic functions	296
	Revision exercises	299
chapter 8	Trigonometry 2.....	304
8.1	Trigonometric identities	304
8.2	Compound angles	307
8.3	Double-angle formulae	312
8.4	Sum, difference and product formulae.....	317
8.5	Inverse trigonometric functions	319
	Revision exercises	321

chapter 9	Sequences, Series, Patterns	325
9.1	Sequences	325
9.2	Arithmetic sequences	329
9.3	Arithmetic series	334
9.4	Geometric sequences	340
9.5	Limits of sequences	346
9.6	Geometric series	348
9.7	Other sequences	353
9.8	Number patterns – revisited	355
	Revision exercises	359
chapter 10	Statistics 1	364
10.1	Types of data	365
10.2	Collecting data	369
10.3	Populations and sampling	374
10.4	Measures of location	379
10.5	Measures of variability	386
10.6	Stem and leaf diagrams (stemplots)	395
10.7	Histograms	403
10.8	The shape of a distribution	406
	Revision exercises	412
chapter 11	Coordinate Geometry: the Circle	420
11.1	The equation of a circle with centre (0,0)	420
11.2	Equations of a circle with centres not at (0,0)	423
11.3	Finding the equation of a circle	427
11.4	Tangents to a circle	436
11.5	Lines and circles: common chord	442
11.6	Touching circles: chords and circles	446
11.7	Circles touching the x-axis or y-axis	449
	Revision exercises	452
chapter 12	Algebra 3	456
12.1	Revision	456
12.2	Quadratic and rational inequalities	460
12.3	Modulus	465
12.4	Mathematical proof	469
12.5	Proofs of abstract inequalities	471
12.6	Indices	474
12.7	Exponential equations	478
12.8	Exponential functions	480
12.9	Logarithmic function	485
12.10	The graph of $y = \log_a(x)$	491
12.11	Problem-solving with exponential and log functions	493
12.12	Proofs by induction	498
	Revision exercises	506
	Answers	512
